Allow on Workable Issue Condition

On this page:

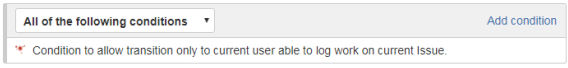
- Overview
- Edit and View Parameters
- XML Declaration

Overview

This Workflow Condition allows to evaluate if the current User is allowed to Log Work on the Issue, not only depending on Work On Issue permission, but also depending ***Minyaa Time*** rules.

Edit and View Parameters

When defined, there is no special configuration.



XML Declaration

The Condition configuration may be done in XML in Workflow descriptor as follow :

```
<condition type="class">
   <arg name="class.name">fr.alkaes.myaatm.workflow.condition.
WorkableIssueCondition</arg>
</condition>
```

- Minyaa Suite
