

Group Delegation Permissions

Overview

As **JIRA Administrator**, you can grant any users the Group Delegation Management since the features of **Users and Group Management for Project Manager** are driven by Custom Permissions.

- The Global Permission **Manage Group Delegation** allows to define who can create **Group Delegations**
- A set of **Project Permissions** allows users to acquire some privilege on **Delegated Groups** identified by the **Group Delegation** for a Project.

Global permission Manage Group Delegation

1. Go to System of the Administration pages
2. In Security section, access to Global Permission
3. Select the Manage Group Delegation and the group to be granted

Add Permission

Permission

Manage Group Delegation

Group

jira-administrators

Add

4. and click Add

Manage Group Delegation Ability to create Delegated Group in Projects	<ul style="list-style-type: none">jira-administrators <div>View UsersDelete</div>
---	---

5. Repeat for each other groups

The permission can be granted to Non Administrators ! It means that you have to delegate this permission to trusted people.

In case of first steps, it is better to keep this permission to administrators.

Project Permissions on Delegated Groups

As JIRA Administrator, you will be also in charge of specifying which Users/Project Roles/Groups will be allowed to benefit the Project Permissions on Delegated Groups.

Project Permissions	Descriptions
Manage Groups in Delegated Groups	Allows users to manage Groups' Membership for Delegated Groups
Manage Users in Delegated Groups	Allows users to manage Users' Membership for Delegated Groups
Show Members of Delegated Groups	Allows users to show Members (User) of Delegated Groups
Show Nested Groups of Delegated Groups	Allows users to show Members (Nested Groups) of Delegated Groups
Show Nested Users of Delegated Groups	Allows users to show Members (Nested Users) of Delegated Groups
