

Shared Reports

Predefined Reports defined by Reports Scheme may (will) be available in different screens of JIRA ...

- In a [Reports Project](#) Tab panel of the Project View,
- In new Gadget, similar as the Fragment Gadget,
- As a Menu in the Issue View.

On this page:

- [Reports Project Tab Panel](#)
- [Gadget Report](#)
- [Issue View](#)

Reports Project Tab Panel

A new Project Tab Panel, named **Reports**, is provided with 2 sections :

- A 1st section providing the list of all available Project Reports (Similar section as Report section in Summary TabPanel in JIRA 5.2.1).
- A 2nd section providing the list of all predefined Project Reports ...
 - This list displays all **Report Configurations** defined in the [Report Scheme](#) associated to the current Project.
 - Each **Report Configurations** is converted into a link to special action able to *contextualized* parameters, before redirecting the request to the final Report Action.
