

# Migrate Predefined Reports from Minyaa 3.x to 4.x

## Overview

When upgrading from Minyaa 3.x to Minyaa 4.x, the stored predefined reports will always be stored, but if these reports are concerned by some evolution in their parameters, their conversion will be not covered by the Minyaa Report plugins.

Sadly, Minyaa Reports is not able to know how to convert them. Its behavior is more like your favorites/shortcut to a site/request in your browser ... When creating them, you may experience some change with future evolution of this site.

## How to process ?

The more efficient way is to re-capture the same reports in the new version, and then update your previous predefined reports.

## Reports from Minyaa plugins

You will find below some of change to perform for Reports provided by Minyaa Plugins.

Between Minyaa 3.x and Minyaa 4.x, the only change performed are related the Report Key, based on plugin Key.

Plugin		
Minyaa Time	jira.plugin.minyaa.time	fr.alkaes.minyaa.jira-plugin-minyaa-time
Minyaa Workflows	jira.plugin.minyaa.workflows	fr.alkaes.minyaa.jira-plugin-minyaa-workflows

The update can be done without stopping JIRA, since no cache are managed for Predefined Report Definitions.

```
-- For Minyaa Time
UPDATE reportentity SET REPORT_KEY='fr.alkaes.minyaa.jira-plugin-minyaa-time:workload-IssueType' WHERE
REPORT_KEY='jira.plugin.minyaa.time:workload-IssueType';
UPDATE reportentity SET REPORT_KEY='fr.alkaes.minyaa.jira-plugin-minyaa-time:workload-project' WHERE
REPORT_KEY='jira.plugin.minyaa.time:workload-project';
UPDATE reportentity SET REPORT_KEY='fr.alkaes.minyaa.jira-plugin-minyaa-time:workloadOnPeriod' WHERE
REPORT_KEY='jira.plugin.minyaa.time:workloadOnPeriod';
UPDATE reportentity SET REPORT_KEY='fr.alkaes.minyaa.jira-plugin-minyaa-time:workload-issue' WHERE
REPORT_KEY='jira.plugin.minyaa.time:workload-issue';
UPDATE reportentity SET REPORT_KEY='fr.alkaes.minyaa.jira-plugin-minyaa-time:workload-WorklogType' WHERE
REPORT_KEY='jira.plugin.minyaa.time:workload-WorklogType';

-- For Minyaa Workflows
UPDATE reportentity SET REPORT_KEY='fr.alkaes.minyaa.jira-plugin-minyaa-workflows:stats-transitions' WHERE
REPORT_KEY='jira.plugin.minyaa.workflows:stats-transitions';
```

## Other Reports

If you have used Minyaa Reports for Report from others Plugins, you will have to identify by yourself the needed changes.

Do not hesitate to share them !

```
-- Sample for Created vs Resolved report
UPDATE reportentity SET REPORT_KEY='com.atlassian.jira.jira-core-reports-plugin:createdvsresolved-report' WHERE
REPORT_KEY='com.atlassian.jira.plugin.system.reports:createdvsresolved-report';
```
