- [How to configure them ?](#)

How to configure them ?

When adding a new **Customfield**, select one of the two related **Customfield Types** :

No field preview

Multi Project Role Picker (ALKUS)
Customfield for selecting a Multi Project Role (Filtered by Pattern)

No field preview

Single Project Role Picker (ALKUS)
Customfield for selecting a Single Project Role (Filtered by Pattern)

Then, you will be able to configure your customfield in order to filter the Project Roles allowed on selection.

Applicable contexts for scheme: [Edit Configuration](#)
Issue type(s):
Global (all issues)

Default Value: [Edit Default Value](#)

Pattern on Project Role Name: [Edit Pattern on Project Role Name](#)

Pattern on Project Role Description: [Edit Pattern on Project Role Description](#)

It can be done by using Regular Expressions (See [Pattern Oracle Javadoc](#)), on **Project Role Name**

Configure a RegExp Pattern for the field [Multi Project Role Picker]

Define a Regular Expression Pattern on Pattern on Project Role Name.

Pattern on Project Role Name:

[See Pattern Oracle Javadoc...](#)

or on **Project Role Description**

Configure a RegExp Pattern for the field [Multi Project Role Picker]

Define a Regular Expression Pattern on Pattern on Project Role Description.

Pattern on Project Role Description:

[See Pattern Oracle Javadoc...](#)

- [Minyaa Suite](#)
