Assigning Conditions

Usage Cases

These conditions evaluate if the current Issue is or not assigned.
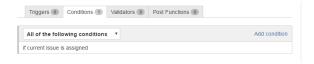

Add the Condition

Select **Is Assigned** or **Is Unassigned** ...

○	Is Assigned ⁽*⁾	Transition allowed if current issue is assigned
○	Is Unassigned ⁽*⁾	Transition allowed if current issue is unassigned

View when defined

In case of **Assigned Condition**,

Triggers 0	Conditions 1	Validators 0	Post Functions 6

All of the following conditions ▼   Add condition

if current issue is assigned

In case of **Unassigned Condition**,

Triggers 0	Conditions 1	Validators 0	Post Functions 6

All of the following conditions ▼   Add condition

if current issue is unassigned

XML Declaration

The Condition configuration may be done in XML in Workflow descriptor as follow :

```
<condition type="class">
   <arg name="class.name">fr.alkaes.myaawf.workflow.condition.
IsAssignedCondition</arg>
</condition>
```

or ...

```
 <condition type="class">
   <arg name="class.name">fr.alkaes.myaawf.workflow.condition.
IsUnassignedCondition</arg>
</condition>
```
