On Resolution Comments

Commented Resolution Validator

On this page:

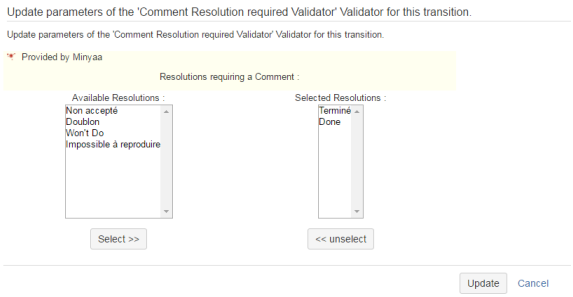

- Commented Resolution Validator
  - Overview
  - Edit and View Parameters
  - XML Declaration

Overview

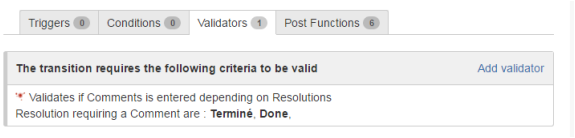

This validator controls if current user has specified a comment for some resolution.

Edit and View Parameters

It is possible to select Resolution for which a Comment is needed.

When specified, the selection of these resolutions will require a comment.

XML Declaration

The Validator configuration may be done in XML in Workflow descriptor as follow :

```
<validator name="" type="class">
        <arg name="resolutionsSelected">10000,10102,</arg>
        <arg name="class.name">fr.alkaes.myaawf.workflow.validator.
ResolutionCommentValidator</arg>
</validator>
```

- Minyaa Suite
