List of Worklog Types

When accessing the **Worklog Types** page, all previously created **Worklog Types** will be displayed.

Worklog Types

As JIRA Administrator, you define here the different Worklog Types applicable of Log Work action.
URL Icons can defined by using a relative path as described in this documentation page ,or in absolute path. In such case, the URL will be verified against Whitelist (if enabled).

Worklog Types

Name	Description	Icon		Color	
					Add
Analysis	Analysis			#c0fff5	
Development	Development			#1e63ff	
Documentation	Documentation			#ff4ee8	
Meeting	Meeting			#fdffd1	
Studies	Studies			#e9ffdd	
Releasing Process	Releasing Process			#e7ff09	
Test	Test			#0054b	

A **Worklog Type** is described by these below attributes ...

Attributes	Description
Name	The name of the *Worklog Type*. *(Since Worklog Type have been moved under AO, the ability to translate Name is no more available)*
Description	The description the *Worklog Type*. *(Since Worklog Type have been moved under AO, the ability translate Description is no more available)*

Icon	Path to the icon relative to JIRA's appplication path. This icon is used for report generation. Some default icons are available (see below table)
Color	A color representing the *Worklog Type*. This color is used for report generation.
Order	This attribute stores the order in which *Worklog Type* will appear in the *Worklog Gadget* and in *JIRA's Log Work* page. It is updated when moving the *Workog Type* row.

Create/Update a Worklog Type

You can add your own **Worklog Type** by specifiying the different expected attributes, and then clicking on **Add**.

When the Worklog Type is created, you can re-edit it and **Update** the row with relevant modifications.

On Create and Update phases, the unicity f Worklog Types is verified.

Delete a Worklog Type

When trying to delete a *Worklog Type*, if it is always used, it will be possible :

- to merge to the selected *Worklog Type*, without removing the *Worklog Type*.

  The deletion will be possible in a second step.
- to merge and remove the *Worklog Type* in the same operation
- only to remove the *Worklog Type*.

Worklog Type Icons

When creating/editing *Worklog Type*, you can specify any Icon, by using an absolute or based on *contextPath*.

You can use icons already present in Issue Type configuration.

The plugin embeds additional **Worklog Type** icons. To use them, you will have to specify a Icon path with :

- following format : */download/resources/fr.alkaes.minyaa.jira-plugin-minyaa-time:myaatm-icons/icons/worklogtypes/**<IconFileName>***

- where **<IconFileName>** is one of below icons file name

<u>Predefined Icons :</u>

Worklog Type	Icon	Icon file Name

Studies		wlStudies_16.png

About Translation capacities

Instead of **Minyaa 3.x**, where **Worklog Type** was based on a extension of the JIRA Constant Manager and where Minyaa was able to benefit from the Constant Translation Manager, **Minyaa 4.x** has not yet a Translation mechanism.
