# Enhancement around Rendering

## Overview

Sometime, by simply reviewing the rendering of a page, we are able to gain efficiency in our administration operation with :

- a better visibility of all options
- a larger screen for useful data
- few additional color

Try the following enhancements ...

## Enhancements

### Add Permission

The enhancement in the Permision screen consists simply in a re-arrangement of list of Permissions and Security Type. Since JIRA 7.1.X, this enhancement is obsolete due the new way to add Permissions in a Permission Scheme through an Edit Permission Popup.

### Administration Docker

This enhancement based on a quick Docker in Administration Pages allows to gain space for the rendering of the more relevant content of each of these pages.

### Highlighting Administration Menu section

This enhancement allows to highlight the Administration Menu section.

### More Auto-Completion

This enhancement allows you to benefit of Auto-Completion capabilities in more case.
