

Assigning Conditions

Usage Cases

These conditions evaluate if the current Issue is or not assigned.

Add the Condition

Select *Is Assigned* or *Is Unassigned* ...

- Is Assigned ^{*} Transition allowed if current issue is assigned
- Is Unassigned ^{*} Transition allowed if current issue is unassigned

View when defined

In case of **Assigned Condition**,

Triggers 0 Conditions 1 Validators 0 Post Functions 0

All of the following conditions ▾ Add condition

if current issue is assigned

In case of **Unassigned Condition**,

Triggers 0 Conditions 1 Validators 0 Post Functions 0

All of the following conditions ▾ Add condition

if current issue is unassigned

XML Declaration

The Condition configuration may be done in XML in Workflow descriptor as follow :

```
<condition type="class">
  <arg name="class.name">fr.alkaes.myaawf.workflow.condition.
  IsAssignedCondition</arg>
</condition>
```

or ...

```
<condition type="class">
  <arg name="class.name">fr.alkaes.myaawf.workflow.condition.
  IsUnassignedCondition</arg>
</condition>
```
