

# Concepts

## Group Delegation

A **Group Delegation** is a rule that defines, for a Project and a Group, a population allowed to benefit from a set of features on this **Delegated Group**.

## Delegated Group

It is a Group for which a delegation has been defined.

## Features on a Delegated Group

Available features on **Delegated Group** are :

- **Users managed by** : It allows granted people to manage the membership of user in a group
- **Groups managed by** : It allows granted people to manage the membership of groups in a group (Nested Groups)
- **Group's members displayed to** : It allows granted people to see which users are members of a group
- **Nested groups displayed to** : It allows granted people to see which groups are members of a group
- **Nested members displayed to** : It allows granted people to see which users are members of nested groups of a group

## Grantable People

In a Group Delegation, the allowed people are identified following 3 ways :

	The Project Administrator of the concerned Project
	The members of the concerned Group
	Any User granted with the Project Permission matching with the Delegated Feature
