

Log Work by Delegation

What is it?

The problem you need to solve:

- Work should be logged for a user but he isn't able to log it right now,
- A logged work needs to be corrected by the Project leader,
- The author of a logged work has to be updated.

How Minyaa solves this problem: Minyaa allows you to grant a user the privilege to log time for another user (allowed to log work too).

- To create a worklog
- To update a worklog

The screenshot shows the 'Edit Log Work' form. The 'Author' field is highlighted with a red box. Below the 'Author' field, there is a text input field with the placeholder 'Start typing to get a list of possible matches. Enter the Worker id.' and a small icon of a person. The 'Time Spent' field has a dropdown menu with 'Undefined Type' selected. The 'Start Date' field shows '15/Aug/16 9:58 PM'. The 'Adjust Estimate' section has three radio buttons: 'Adjust automatically' (selected), 'Use existing estimate of 1 week, 2 hours, 40 minutes', and 'Set to'. The 'Work Description' field has a rich text editor with various formatting options.

Minyaa 3.x

Thanks for noting that the documentation with **Minyaa Time 3.x** is available [here](#).

Allowing a User to Log Work by Delegation

In order to allow users or a group to log work for other users, you have to grant them the **Edit Worklogs for Team Members** Project Permission Scheme.

Permission	Users / Groups / Project Roles
Edit Worklog for Team's Members Gives the ability to Edit Worklog for Team's Members	Group (jira-administrators)

For more information on permission management in JIRA, please see [JIRA: Managing Project Permissions](#)
