

Worklog Fields

What is it ?

The problem you need to solve ...

After having qualified the type of work (Analysis, Development, ...) by using the [Worklog Types \(Obsolete\)](#)... (introduced in response to [JRA-1780](#)), you want also specify if the related spent time is chargeable, or append additional details related the logged work.

How it has been solved ...

Minyaa introduces the notion of **Worklog Fields**. should be enlarge

Since the solution may differ depending on your final needs, it has been decided to allow you (or your Atlassian Partner) to define by yourself these **Worklog Fields**.

Minyaa (at the moment) provides only a sample Worklog Field, but it should be extended to new fields in futures releases.

How it Works ?

Minyaa Time introduces new module-type allowing Plugin's developers to build their plugin with their own Worklog Field.

By default Minyaa Time defines a first Worklog Field : **Chargeable**. which provides a simple checkbox to specify, by example, if this related spent time is chargeable to your customer.

But, you may introduce your own Worklog Field. See [Worklog Field Plugin](#).

When are they used ?

Worklog Fields are used in all projects, as soon as they have been provided by a plugin

But, it is possible to restrict the projects where they are applicable.

It can be done by specifying the list of concerned project in the Worklog Field Settings page (see [Minyaa Time Settings](#)).

Projects using Worklog Fields:
List of Project Keys (separated by |) where Worklog Fields are shown. They are always shown if the list is empty.

XXX|YYY|

Save | Cancel

The list of project key has to be separated by a "|".

In future release, a more powerful way to configure applicable Worklog Field will be provided.

Where Is It Available ?

Worklog Fields are available in the following places :

- in Create and Edit Log Work page
- in Worklog Issue Panel

Create and Update Worklog

As soon as a Worklog Field is available for your project, you can see it in the Log Work page (extended by Minyaa) and specify the expected value.

By default, you will see the Worklog field **Chargeable**, between **Start Date** and **Adjust Estimate** fields.

Edit Log Work

Time Spent* (eg. 3w 4d 12h) ?

Worklog Type* ?
Select Worklog Type associated to the spent time.

Author ?
Start typing to get a list of possible matches.
Enter the Worker id.

Start Date* ?

Chargeable
Check it, if the related spent time is chargeable.

Adjust Estimate Adjust automatically
(the estimate will be reduced by the amount of work done, but never below 0.)

View Worklog Fields

For the moment, specified **Worklog Fields** are only visible in the **Worklog +** Issue Panel.
