# **Group Delegation**

**User Management for Project Manager** allows the delegation of Group Membership management to powered users depending on an advanced configuration.

To benefit from this feature, just follow these 2 steps:

- Define who is allowed to manage Group Delegations
- Define a set of Group Delegations :
  - o for which groups (Delegated Group) in which project a delegation has to be created?
  - which powered users are allowed to benefit from this delegation?
  - o which type of delegation is created?

## **Group Delegation Permissions**

As *JIRA Administrator*, you can grant any users the Group Delegation Management since the features of **Users and Group Management for Project Manager** are driven by Custom Permissions.

- The Global Permission Manage Group Delegation allows to define who can create Group Delegations
- A set of Project Permissions allows users to acquire some privilege on Delegated Groups ide ntified by the Group Delegation for a Project.

#### **Define a Group Delegation**

As *Granted User* with the permission Manage Group Delegation, you will be allowed to define which groups will be delegated in which Projects.

### Manage Delegated Groups

As Powered User granted with a "Manage" Group Delegation, you will be allowed to manage:

- · Group's Membership for Users
- Group's Membership for Groups (Nested groups)

#### All features ...

- Group Delegation Permissions
- Define a Group Delegation
- Manage Delegated Groups
