Plugin Versioning

Most of Alkaes Plugins are following the same way to manage their version. The version of JIRA is integrated in the version of the plugin. By example, for *Minyaa 4.0*, two distinct versions have been released :

- Minyaa 6400.4.0 for JIRA 6.4.x (mainly tested against 6.4.12, the last JIRA version supported by Minyaa 3.5.2)
 Minyaa 7000.4.0 for JIRA 7.0.x
