

Edition Dependencies

Minyaa Editions and also other **Alkaes Plugins** are managed with a dedicated License System. The main reason of this is that some of these plugins may be a dependency of another plugins.

This specific licensing system allows to license a plugin with the license of another plugin.

Some examples ...

1. Minyaa Core can be licensed alone
2. When Minyaa Time is licensed, Minyaa Core is automatically licensed
3. When you use Minyaa Suite license, all other Minyaa plugins are also licensed.

We do not exclude to switch to Marketplace licenses as soon as a such way to manage license will be possible.
