

Upgrade from Minyaa 3.5.2 to Minyaa 7000.4.2

Migration from **Minyaa 3.x** under **JIRA 6.2.x** to **JIRA 7.0.x** is now possible with **Minyaa 4.2**.

On this page:

- [Using upgrade with Database](#)

Using upgrade with Database

When you will have to migrate from **Minyaa 3.x** to **Minyaa 7000.4.2** under **JIRA 7.0.x**, you will have to follow the below sequence :

1. Install you new **JIRA 7.0.x** instance on a fresh Database
2. Install the wanted Edition of Minyaa
3. Stop your **JIRA 6.2.x**, **6.3.x** or **6.4.x**,

By security ...

Perform a Database backup of your Production instance !

5. Switch Database settings of **JIRA 7.0.x** to your Production Database
6. **JIRA** and **Minyaa** will perform their upgrade tasks

Of course ...

Since the procedure has been not tested with all combination of plugins, it is better to test the procedure with an Test/Dev environnement.
