

Upgrade Minyaa 6400.4.3 & 7000.4.3

Upgrade from Minyaa 3.5.x

Noting special. Just take care about the different Upgrade Notes of Minyaa 3.5.x

Upgrade from Minyaa 4.2.x

If you have already used Minyaa 4.2, then the UpgradeTask_003 has been already performed in order to move Worklog Type configuration from Active Object to OFBiz. But, due to [ALKMT-8](#), it may have failed.

It is why the UpgradeTask_004 has been introduced.

In all case, if you do not have your Worklog Types transfered from AO to OFBiz, the Upgrade Task can relaunched by a REST API ...

Upgrade Task launched by REST

```
<JIRA_HOST>/rest/minyaaTM/1.0/time/upgrade/fr.alkaes.myaatm.upgrade.  
UpgradeTask_004
```

On this page:

- [Upgrade from Minyaa 3.5.x](#)
- [Upgrade from Minyaa 4.2.x](#)

- [Minyaa Suite](#)
