- How to configure them ?

## How to configure them ?

When adding a new **Customfield**, select the Customfield Type **User Picker By Permissions** :

**User Picker By Permissions**  
Choose a user having authority for one of specified Permissions via a popup picker window

Then, you will be able to configure your customfield in order to filter the User by their Permissions.

Applicable contexts for scheme: [Edit Configuration](#)  
Issue type(s):  
Global (all issues)

Default Value: [Edit Default Value](#)

Permissions: [Edit Permissions](#)  
Permissions:  

- [Browse Projects](#) Ability to browse projects and the issues within them.

The selection of the required Permission can be done in the following screen :

[illegible]

- Minyaa Suite
