

Browse Worklog Permission

Defaultly, JIRA provides only permission to manage Worklog edition (Create or Update).

Minyaa Suite introduces the permission [BROWSE_WORKLOG](#) to extend this control as follow ...

This permission offers first solutions to allow or deny user to see worklogs

This ability is provided on following features :

- **Extended Worklog** Issue Panel
- [Timespent](#) Issue Panel
- **Timetracking** Issue Web Panel

In future, Minyaa will try to extend the supported features, if non intrusive solution are found.

On this page:

- [Minyaa Suite](#)
