# Create Old Worklog Permission

By default, JIRA allows Worklog creation through **EDIT WORLOG** Permission.

Minyaa Suite introduces an additional permission to extend this initial permission ...

Create old Worklog Gives the ability to Create old Worklog.	Add

On this page:

When **Minyaa Time** is enabled, a Worklog can be created by a user if he has

- the permission to Update the Worklog (**EDIT WORLOG** Permission),
- **And** has the permission to *Create Old Worklog*.

This permission to *Create Old Worklog* is evaluated in following cases :

- the user has not the **Project Administration** Permission
- and the **WorkableDelay** ("Worklog.Create.Delay.In.Days" in Application Properties) is positive.

The condition is evaluated as follow :

- Today is not older than **EOM-1M+nD** (End Of Last Month + n Days), where **n** is provided by the **WorkableDelay** parameter.

The **WorkableDelay** ("Worklog.Create.Delay.In.Days" in Application Properties) may be modified through the Minyaa Settings page.

- Minyaa Suite
