Through Workers CustomFields

Minyaa provides CustomFieldTypes and a CustomFieldSearcher based on Worklogs.
Inspired from J.Nolen's Vote and Watcher Plugin.

These modules give the ability to see the list of Worker on an issue.

Current Workers:	guest
All Workers:	guest et Minyaa

Current Workers

This Custom Field Type provides the list of all Current Workers, users which are working on an issue.
Are considered ...

- any user which have enter worklog on an issue,
- or, any user that have added the Issue in its *Working Issue List* (See Log Work from DashBoard)
- and he did not remove the Issue from its *Working Issue List*

All Workers

This Custom Field Type provides the list of all Workers, users which are working or have worked on an issue.
Are considered ...

- any user which have enter worklog on an issue,
- or, any user that have added the Issue in its *Working Issue List* (See Log Work from DashBoard)

All Workers

In both case, a CustomFieldSearcher is available

It allow to list in Issue Navigator all Issues worked by a User.
