Workflow Editor

This Workflow Editor is not really a new editor. It is more a new interface of the native Text Mode editor, but extended with additional features.

On this page:

- Objectives
- How to switch to this enhanced Workflow Editor ?
- A better view of Workflow Concepts ...
- More features to design your workflow ...
- Some sample ...

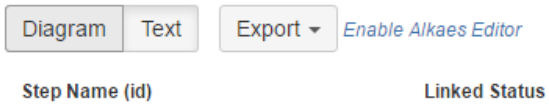

Objectives

Its 2 objectives are :

- To be able to have a better view of real Workflow Concepts,
- To dispose some additional feature in the Workflow edition

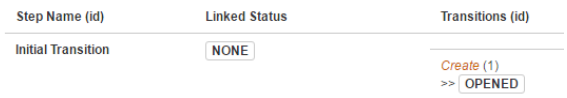

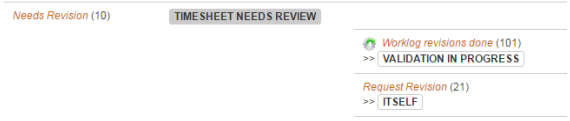

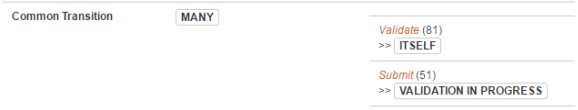

How to switch to this enhanced Workflow Editor ?

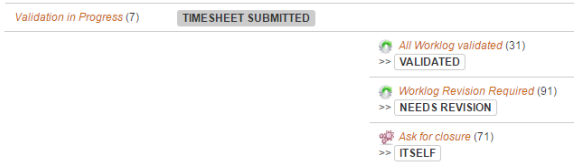

When you are editing a Workflow in Text mode, you are able to switch from this Text mode to this Enhanced Text Mode by clicking on ***Enable Alkaes Editor*** :

This switch is not permanent ... after each operation, you are back to the native mode.

A better view of Workflow Concepts ...

The **Initial Transition** is directly available from this screen ...	
Recursive Transitions are identified with target status named ITSELF	
Global Transitions are grouped in dedicated section with the Status ANY as initial Status	
Common Transitions are also grouped in their own section with MANY as initial Status., but also available from	

Automatic Action and **Auto-Transitions** are identified by a dedicated icon : • for Automatic Action • for Auto-Transitions	

More features to design your workflow ...
