Assigning Conditions

On this page:

- Usage Cases
- Add the Condition
- View when defined
- XML Declaration

Usage Cases

These conditions evaluate if the current Issue is or not assigned.

Add the Condition

Select ***Is Assigned*** or ***Is Unassigned*** ...

View when defined

In case of **Assigned Condition**,

In case of **Unassigned Condition**,

XML Declaration

The Condition configuration may be done in XML in Workflow descriptor as follow :

```
<condition type="class">
   <arg name="class.name">fr.alkaes.myaawf.workflow.condition.
IsAssignedCondition</arg>
</condition>
```

or ...

```
 <condition type="class">
   <arg name="class.name">fr.alkaes.myaawf.workflow.condition.
IsUnassignedCondition</arg>
</condition>
```
