

Highlighting Administration Menu section

Overview

After having installed many plugins, coming with their dedicated menu section in Administration pages, like me, you should lost time to retrieve the different menu entries.

This enhancement try to provide a configurable way to enhance the Menu Section entries.

Enhancements

Two features are provided to highlight your Menu Section in Administration pages :

- Colorization
- Burger Menu

To configure them, go to **Field Administration Enhanced** Settings ...

Field Administration Enhanced Settings	
Set of Parameters used to configure Field Administration Enhanced Jira Plugin	
Allow Menu Docking: <i>If enabled, Menu Docking is allowed</i>	Yes
Allow Highlight Menu Sections: <i>If enabled, Administration Menu Sections are highlighted using below colors.</i>	Yes
Background Color for Menu Sections: <i>Specifies the Background Color for Menu Section in Administration pages.</i>	#087dff 
Font Color for Menu Sections: <i>Specifies the Font Color for Menu Section in Administration pages.</i>	#ffffff 
Font Size for Menu Sections: <i>Specifies the Font Size for Menu Section in Administration pages.</i>	.83em
Allow Burger Menu: <i>If enabled, Administration Menus are converted in Burger Menu, avoiding also some long scroll.</i>	Yes
Screen Load disabled: <i>If No : Native behavior : List of all screens using a field is displayed,else, if Yes : Screens are loaded only on demand in View Field Configuration (License required)</i>	Yes
Screen Scheme Load disabled: <i>If No : Native behavior : List of all Screen Schemes using a Screen is displayed,else if Yes : Screen Schemes are loaded on demand in View Screen (License required, only for Jira < 8.20)</i>	Yes
Workflow details load disabled: <i>If No : Native behavior : All details (descriptions, Author, Update Date) are displayed,else if Yes : Transition Screens are loaded on demand in View Screen (License required)</i>	Yes
Load of Projects in Scheme disabled: <i>If No : Native behavior : All projects in scheme are displayed,else if Yes : Projects using a Workflow Scheme are loaded on demand in View Workflow Scheme (License required)</i>	Yes
Transition Screens Load disabled: <i>If No : Native behavior : List of all Workflows/Transitions using a Screen is displayed,else if Yes : Transition Screens are loaded on demand in View Screen (License required)</i>	Yes
Transition Colorization: <i>If enabled, the Transition Colorization are applied using the rules defined in your Workflows.</i>	Yes

Edit Settings

You will have different parameters available :

For highlighting Menu Sections ...

- **Allow Highlight Menu Sections** will enable the new Menu rendering (If not enabled, 3 others parameters are not take in account)
- **Background Color for Menu Sections** and **Font Color for Menu Sections** can be defined with a Color Picker

- **Font Size for Menu Sections** allows you to define the Font Size (Prefer **em** format. Ex: **0.83em**)

For Burger Menu ...

- **Allow Burger Menu** to converted Menu Section in Expandable/Collapsible Menu section, avoiding also some long scroll.

Notes !

- After plugin installation, you will see some error in logs until the configuration is done.
- To see your configuration applied,
 - you will have to Disable / Re-Enable the plugin (In order to re-inject the generated CSS in the internal Cache)
 - and then, you will need to force the Web browser Cache Refresh. (Ctrl+F5 or Shift + F5 , depending on Browsers)

You will be free to opt the more relevant configuration and also, you will be able to highlight each Section Menu entries as follow ...

A Jira with the native rendering	Menu highlighted	Another combined with Burger Menu
