## **View Custom Fields**

It has no more sense since JIRA 7.12.X, due to the new View Customfield page.

## Overview

As soon as your JIRA Instance defines a complex configuration, the number of Custom Fields may increase quickly.

Even, if you success to limit the number of Custom Fields, you may also introduce some a large number of projects with their own set of screens, and/or have some fields editable during Workflows Transitions.

Consequently, when you access to the *View Custom Field* screen, you will certainly have a very large screen, where you will see for each Custom Field the list of screens where it is defined.

Contributors

User Picker (multiple users)

Issue type(s):
Global (all issues)

OS [Affair, Create] (Affair People)

OS [Affair, View] (Affair People)

OS [Catalog Equipment, Create] (Catalog Equipment People)

OS [Catalog Equipment, Edit] (Catalog Equipment People)

OS [Catalog Equipment, View] (Actors)

## **Enhancement**

The enhancement proposed by this plugin is to provide an Expand/Collapse feature for each Custom Fields.

For each Custom Fields, a count of screen is added in bottom of the screen list and allows, when clicking on it, to expand or to collapse the screen list.

Expanded	Contributors	User Picker (multiple users	issue typė(s Global (all is			
Collapsed	Contributors		Issue type(s): Global (all issues)	6 item(s)	<b>\$</b> ~	

It appears to be a small gain, but by accumulating all you Custom Fields, you will see the difference.

## Sample

Below a example with a JIRA Instance 5 Projects, 8 Workflows, 86 Custom Fields and 31 Screens. When expanded, we have to scroll on 9 screens, and 6 when collapsed.

Imagine the gain with more complex JIRA Instances.

Collapsed

Custom Fields			Add Custom Fresh	ekts.
