

Administration Docker

Overview

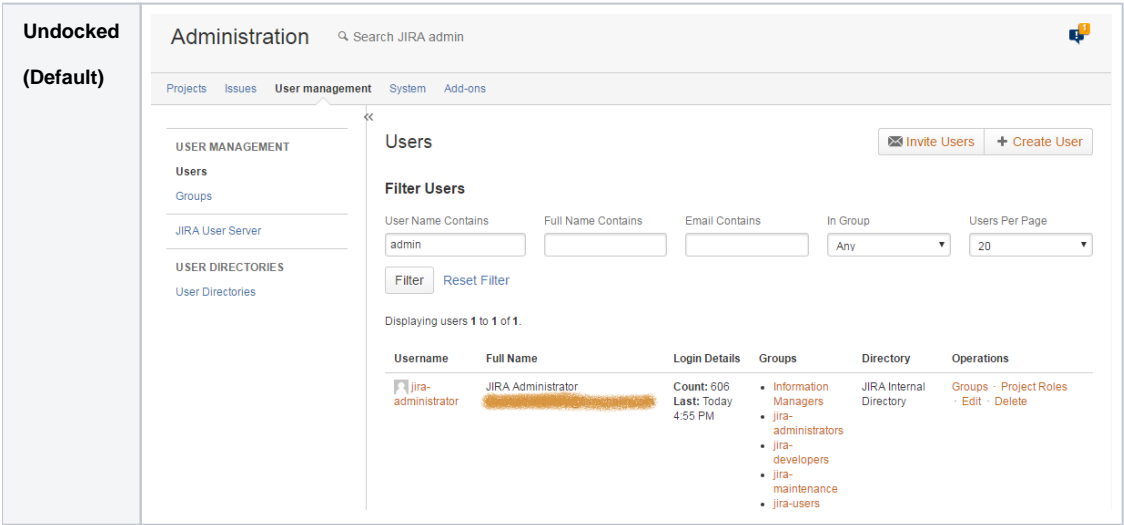

Sometime, you may have to access JIRA administration page from Laptop just with 15" screen device, and then you experience in such case some word wrapping.

Enhancement

In order to avoid this word wrapping, and to have a better focus on the viewed administration page, this plugin append, on all Administration pages, a **Docker Icon**. "⏏".

By simply clicking on it, you can "dock" the Administration Menu and also have a gain of space in your screen. It will improve the rendering of the viewed administration page.
