

More Auto-Completion

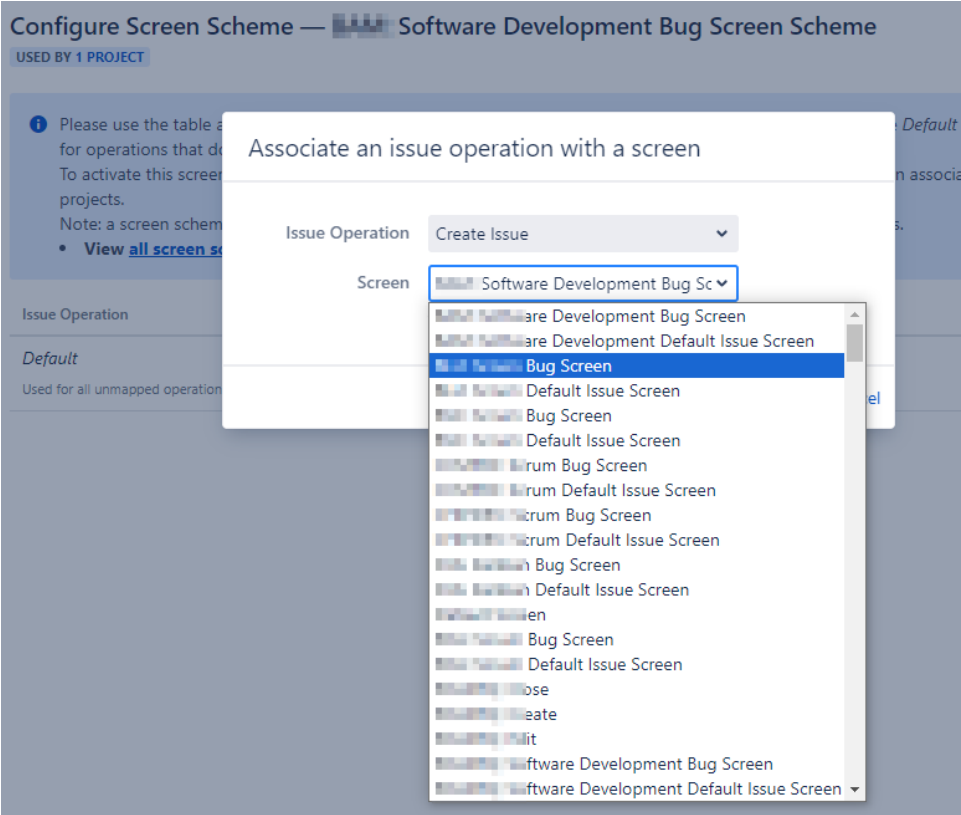

Overview

Sometime, in case of large instance, you may have too many selectable item in some Dropdown List (Screen, Screen Scheme, ..), and then you experience some difficulties to find/select the expected item.

- Create **Screen Scheme** ,

- Associate **Screen** in **Screen Scheme** Edit

- [illegible]

In order to simplify this selection, this feature will enable the **Auto-Completion** on different Dropdown List by converting them in AJS Single Select.

- The **Screens** selection in
 - Create/Edit popup of **Screen Scheme** ,
- The **Screen Scheme** selection in :
 - Create/Edit popup of **Issue Type Screen Scheme** .

Configure Issue Type Screen Scheme: Software Development Issue Type Screen Scheme

USED BY 1 PROJECT

i This scheme can be used for all issue types. The *Default* entry specifies the default screen scheme. View [all issue type screen schemes](#).

Issue Type

Default

Used for all unmapped issue types.
