

View Worklogs

Overview

Minyaa Time provides different extensions around the Log Work feature of JIRA ...

In Time Spent Panel

... where you will be able to display logged spent time by different criteria.

Through Workers CustomFields

These 2 customfields will show who is working on your issue. They will too allow you to search for an Issue where a user is/has worked on.

In Worklog Reports

Few Worklog Reports are provided allowing to aggregate Worklog based on different criteria.

- [Worklog Reports Concepts](#) — All provided Worklog Reports share some common concepts :...
Aggregation, Hierarchie and Flat views
 - [Third Part Aggregation Criteria](#)
- [Available Worklog Reports](#) — It allows you to append, as allows JIRA since 4.2, a Log Work Field in Transition Screen. Even if it is a native feature now, you will need to continue with it if you want to benefit from Worklog Type.
 - [Workload Report \(Worklog Type\)](#)
 - [Workload Report - Issue](#)
 - [Workload Report - Issue Type](#)
 - [Workload Issue Type in details](#) — It allows you to append, as allows JIRA since 4.2, a Log Work Field in Transition Screen. Even if it is a native feature now, you will need to continue with it if you want to benefit from Worklog Type.
